

Cutting-Edge

Predictive Analytics

To Stop Nuclear Verdicts®

At **Schaefer City Technologies**, we combine AI innovation, trial lawyer expertise and insurance industry knowledge to deliver tools like **NaVel®** & **Big Blue™**. Our software analyzes claims, predicts risks, and provides actionable strategies to prevent runaway verdicts.

Value You Can't Find Anywhere Else!

We leverage detailed analysis of **100,000+** insurance industry claims and court cases along with the combined legal expertise of a national insurance defense law firm.

How Did We Transform This Data?

The unique legal analysis of the 100,000+ cases was used to create a suite of **patented AI-powered predictive analytics models** that carriers and reinsurers can cost-effectively leverage to identify potential high severity claims and reduce the frequency of **Nuclear Verdicts®**.

What Your Claims Team Can't Do

Our solution combines **10 million+ data points** from across the industry. No one carrier or reinsurer has this knowledge. Our **analytics provide insights beyond** your in-house teams.
